REMOVAL ACTIVITIES TO DATE: The following removal activities were undertaken for the period of 9/17/95 thru 9/25/95:

RES continued to remove non-hazardous and hazardous debris from the work areas to rolloff boxes. RES continued scraping, chipping, and power-washing vats containing chromic acid solution. 5,000 gallons of chromic acid solution were transported on 9/25/95 off-site to Research Oil Company in Cleveland, Ohio. RES and TAT conducted bench testing to determine the compatibility of the nickel liquid and chromic acid solution. Approximately 400 gallons of nickel liquid were incorporated into the chromic liquid waste stream and transported off site on 9/25/95. Demobed personnel and equipment for weekend (9/23-9/24).

NEXT STEPS:

- Continue bulking of acid waste stream.

- Sample all suspected asbestos containing material and obtain cost estimates for removal.
- Continue debris removal and disposal.
